

GYEON®
quartz cloth

**INNOVATIVE
CAR CARE**

FIND OUT MORE ABOUT GYEON

Gyeon offers a range of premium quality products, which have been thoroughly tested to satisfy the needs of car detailing enthusiasts, as well as the exacting requirements of professionals. At Gyeon, we have spared no expense in providing you with the most innovative solutions, always producing exceptional results and giving satisfaction.

HISTORY & FACTORY

Since the early years of the new millennium, we have been convinced that the car care world is missing a quality, technologically advanced and customer focused brand. Years of development, testing and searching for the best ingredients lead to the debut of Gyeon Quartz in 2012. The brand quickly established its position as the market leader in top notch ceramic coatings, innovative maintenance products, user friendly formulas and state of the art packaging. Growth and evolution lead us through various locations until 2016 when Gyeon settled in its spacious new facility based in the heart of South Korea.

OUR ULTIMATE TECHNOLOGIES

Protection based on silicon dioxide (SiO_2) is the most sophisticated car protection technology which has been developed to date.

Previously exploited by the most demanding consumers in the electronics industry or used to protect railway rolling stock from vandalism, this formulation is now being introduced in its unique form to the automotive business by the Gyeon brand. The crucial properties of the quartz coating are its ability to increase the overall hardness of the paint up to the level of 9H (hardness of the coating determined by pencil hardness scale)

as well as its measurable thickness, reaching up to 1 micron. However, the most critical property is the structural integrity displayed by the layer. After vaporizing all the solvents contained in the product, where 90 % evaporates within the first 24 hours and a total of 100% vaporization might be accomplished after 14 days, the layer becomes solid, very hard and highly durable.

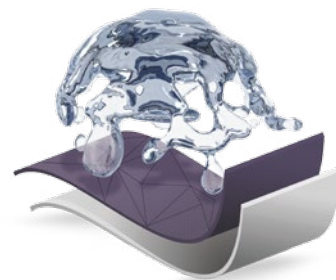

UNIQUE FORMULA AND WARRANTY

Years of laboratory development and real world testing on 6 continents have shown our formulas to be extremely durable and resistant. Therefore, we're completely confident in our product and are proud to guarantee 5 years of full protection with both of our professional coatings systems – Q² Mohs+ and Q² DuraBead.

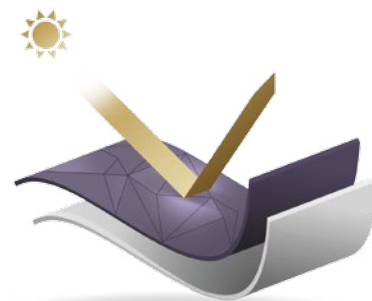

RESISTANCE

All protective coatings created by Gyeon are based on SiO₂, which is a guarantee of exceptional resistance to chemicals with a pH of 2-11, as well as to other harmful substances present on the roads and in the atmosphere.

DURABILITY

Gyeon is a standard-setter when it comes to the durability of protective coatings, offering all detailing enthusiasts maximum performance, while professionals can benefit from a 5-year warranty for Q² Mohs+ and Q² DuraBead protection.

EFFECT

One of the primary reasons behind conducting an auto-detailing treatment is the protection of the surface, but it's also to enhance the vehicle's looks. Gyeon combines exceptional durability with visual effects that often overshadow the performance of natural waxes.

GET TO KNOW **ALL OUR PRODUCTS COLLECTIONS**

After many years of detailing experience and vigorous research, we bring you our ultimate, quartz-based solutions for your car and business. Every single item in our range complies with our mission to deliver the very best product in terms of quality, durability and ease of use. They are thoroughly tested by scientists in the laboratory and also by professional detailing businesses before they ever reach the market, to guarantee you proven results and indisputable quality.

Q² PRODUCT COLLECTION TOP QUARTZ COATINGS

A superb complementary series of advanced quartz-based products for outstanding detailing performance.

The Q² range offers hi-tech coatings for both amateurs and detailing professionals.

Q² CANCOAT

The easiest to apply quartz coating with outstanding hydrophobicity and gloss.

Simply spray onto the attached microfiber and wipe until you achieve full gloss. That's how easy it is to apply Q² CanCoat! This product provides an outstanding and durable SiO₂-based coating, which is easy to apply and durable at the same time.

BOX CONTAINS: Q² CANCOAT / 3 SPRAY HEADS / 1 MICROFIBER

AVAILABLE CAPACITIES: 200 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

DURABLE

Q² CanCoat applied to your vehicle's paint provides you with a protective layer against UV-rays, strong chemicals, bird droppings or road salt, and also prevents the paint's oxidation. Q² CanCoat will retain most of its hydrophobic and self-cleaning abilities up to 6 months/10k km.

Q² PRIME

A protective coating with great durability and high hydrophobicity.

One of the key characteristics of Q² Prime, especially when compared with other protective coatings, is its unparalleled self-cleaning ability. This property can significantly extend the intervals between car washes. Of course the coating does not remain perfectly clean after a long drive in bad weather conditions, but it does help considerably and will also make it a lot easier to safely remove the residual dirt afterwards.

EASY TO APPLY

The real benefit of Q² Prime is its amazingly simple application. It is a highly advanced product based on silicon dioxide (SiO₂), which requires only a similar amount of technique and effort as a natural car wax to apply, even for a novice enthusiast. In the Q² Prime kit, an ergonomic applicator is included, which allows fast and effective application of the product over the paint it is much easier than a number of other 'coatings' and even some regular polishes.

BOX CONTAINS: Q² PRIME / Q²M CURE 100ML
MANUAL / APPLICATOR / 4 SUEDE CLOTHS

Q² PRIME AVAILABLE CAPACITIES: 30 ML / 50 ML / 100 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

GLOSS AND DEEP REFLECTIONS

Q² Prime has been developed to bring together the expectations of various groups of users. It is one of the first products based on quartz technology that guarantees the depth and high contrast of the paint, which, in most cases, overtakes the parameters offered by top-class Carnauba-based waxes.

Q² MATTE

Enhances color without changing the finish of your paintwork.

Unique quartz coating for matte paint. Enhances color without changing the finish of your matte paintwork. Q² Matte is very easy to apply - only one layer is required. It is extremely hydrophobic and designed for maximum durability on matte finish automotive paint. Prevents discoloration and oxidation, protects against strong chemicals, road salt and UV-rays. The coating is resistant to any chemicals with a PH value from 2 up to 11.

LEAVES A FULLY MATTE FINISH

Apart from its simple application, a major benefit of Q² Matte is its neutral finish on matte or satin paints. Its highly advanced, silicon dioxide (SiO₂)-based formula has been specially designed to provide full UV and chemical protection combined with great self-cleaning properties on the very demanding structure of matte paintwork.

BOX CONTAINS: Q² MATTE / Q²M CURE MATTE 100ML
MANUAL / APPLICATOR / 4 SUEDE CLOTHS

Q² MATTE AVAILABLE CAPACITIES: 50 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

THE ULTIMATE SOLUTION FOR MATTE FINISHED CARS

Q² Matte is the most advanced quartz coating designed only for matte finished paintworks. As the formula has been created from scratch, it provides incredible durability in comparison with regular, versatile products.

Q² MOHS

Advanced quartz technology combined
with user friendly characteristics

Durability is one of most salient merits of the product. It is able to maintain 80% of its original hydrophobic properties and to last on the paint throughout a period of at least 12 months, thus being a guarantor of optimum car protection against environmental factors and exploitation conditions. If compared with waxes, even the top-performing ones, it lasts three times longer.

THE HARDEST COATING EVER DEVELOPED

Q² Mohs is the hardest automotive paint coating available to a wide range of users. Given the average automotive paint hardness, which lies within the range of 3-4H according to the pencil hardness scale, Q² Mohs adds a further 3H, which makes the paint extremely resistant to scratches.

BOX CONTAINS: Q² MOHS / Q²M CURE 100ML
MANUAL / APPLICATOR / 4 SUEDE CLOTHS / FACEMASK

Q² MOHS AVAILABLE CAPACITIES: 30 ML / 50 ML / 100 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

The extraordinary hardness of the coating preserves the effects achieved during the paint correction and is synonymous with a much slower paint degradation during maintenance.

THICK AND BARELY SHRINKING

As opposed to the majority of coatings present on the market, Q² Mohs demonstrates the lowest shrinkability parameters. Whereas most coatings shrink from 0.2 up to 0.03 microns, the shrinkability of Q² Mohs does not exceed the level of 5%, while its thickness – 0.2 microns as registered just after application, drops to 0.19 when fully dried. Traditional protective products, such as wax or polymers, do not display any measurable thickness whatsoever.

Q² MOHS+

A highly advanced professional ceramic coating set.

The Q² Mohs+ set is dedicated only to Gyeon certified detailers, who are approved, trained detailing professionals. Only the possession of a Gyeon certificate allows purchase of the Q² Mohs+ coating set with a 5 year warranty.

TOP OF THE RANGE COATING SYSTEM

Q² Mohs+ set is the most superb form of automotive paint coating available on the market.

BOX CONTAINS: Q² MOHS / Q² PHOBIC 20ML / Q²M CURE 100ML
MANUAL / APPLICATOR / 4 SUEDE CLOTHS / WARRANTY / FACEMASK

Q² MOHS AVAILABLE CAPACITIES:
50 ML / 100 ML

PRODUCT PURPOSE:
PAINT / GLASS / TRIM / WHEELS

Designed for professionals only and used by certified Gyeon detailing points, comes with the warranty of the highest level of protection, which refers to the outstanding properties throughout the full period of five years.

MAXIMUM HARDNESS IN AUTOMOTIVE PAINT PROTECTION

Whilst Q² Mohs is the hardest ever automotive paint coating tailored to the needs of every detailing enthusiast, our Q² Mohs+ set takes the standards even higher. By applying both coatings, Q² Mohs and Q² Phobic, respectively, we achieve a total hardness at a level of 9H in the pencil hardness scale. The finishing result cannot be overestimated – by implementing only typical maintenance procedures, such as regular car washing, we may, throughout the entire period of its exploitation, avoid necessity to undertake any paint correction.

Q² DURABEAD

Advanced quartz technology combined with user friendly characteristics.

Q² DuraBead is a advanced, two-ingredient and multi-layer ceramic coating designed to suit the requirements of Gyeon Certified Detailers. Multiple layers of Q² Mohs as the base coat topped with a extremely hydrophobic, flourine-based top coat Q² Bead results in incomparable hydrophobicity, self-cleaning and great durability.

SUPERB SELF-CLEANING

In all of Gyeon's coatings, the self-cleaning ability is very visible and apparent, but Q² DuraBead exceeds all known standards in this area, possessing not only a very strong hydrophobic ability, but also being probably one of the most anti-static products for automotive paint, thus attracting much less dirt and dust in the first place.

—
BOX CONTAINS: Q² MOHS 50ML / Q² BEAD 30ML
MANUAL / APPLICATOR / 4 SUEDE CLOTHS / WARRANTY / FACEMASK
PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

5-YEAR WARRANTY

It is recommended to apply two layers of Q² Mohs (three 3 layers is absolutely optimal) and then apply the Q² Bead coating over the top of these. This process will guarantee a super-hydrophobic effect of water beading along with ultimate durability easily reaching up to 5 years.

AWARD-WINNING FORMULAS

Gyeon formulas have been laboratory tested by the world's most respected institutes and are appreciated by extremely demanding professionals. Gyeon has received multiple consumer awards.

If you love extreme beading, Q² Booster is the finest product on the market to achieve it. It generates extreme hydrophobicity, when paired with HQ quartz coatings, reaching a contact angle of up to 120°.

Q² BOOSTER

The first universal hydrophobicity-boosting top-coat.

VERY EASY APPLICATION

The application of Q² Booster is child's play. Prepare the surface, ensuring an oil/grease free finish and apply moderate amounts in a criss-cross motion. Thanks to the fast evaporating formula, Q² Booster requires only light and easy polishing.

BOX CONTAINS: Q² BOOSTER 30ML / APPLICATOR / 4 SUEDE CLOTHS
PRODUCT PURPOSE: PAINT

A UNIVERSAL TOP COAT

Q² Booster is the easiest way to get the most out of your coating of choice. No matter whether it's Q² Prime, Q² Mohs or something outside the Gyeon range, you can increase durability and hydrophobicity massively.

Q² TRIM

Quality, quartz-based trim coating.

Q² Trim has a formula that allows it to be applied on different vehicles' parts: on plastics with their own structure, on unpainted parts, on so-called piano-black materials, which are most problematic to maintain, and on lamp and headlight shades after renovation has been conducted. That unique quality is unlikely to be encountered in other available products.

BOX CONTAINS: Q² TRIM 30ML / MANUAL / APPLICATOR / 4 SUEDE CLOTHS / FACEMASK
PRODUCT PURPOSE: TRIM

QUARTZ-BASED

The major difference between Q² Trim and various other trim restoring products is its pure SiO₂ base. It does not leave an oily layer on the trim's surface, but strongly bonds with its structure, leaving a thick coat.

Q² RIM

A unique rim-only quartz coating.

There are various wheel rim types available on the market, e.g. wet painted, powder coated, anodized or polished. Q² Rim is an appropriate product to secure each and every one of them. Even the owners of models with polished lips have registered that the need to refresh the so-called mirror effect is significantly less frequent.

BOX CONTAINS: Q² RIM 30ML / MANUAL / APPLICATOR / 4 SUEDE CLOTHS / FACEMASK
PRODUCT PURPOSE: WHEELS

TEMPERATURE RESISTANT

Wheels, just after the engine bay and exhausts, are the components that are most exposed to high temperatures. Q² Rim has an endurance capability exceeding 800°C without any damage to its original properties. The fact that this quartz coating is dedicated exclusively to rims is an asset and introduces a new level of quality within the field of rim protection.

Q² VIEW

Durable and effective invisible windscreen.

There are many hydrophobic coatings available on the market, but durability leaves a lot to be desired. Our product combines two of the most desired characteristics for this type of product. It remains on the most intensely utilized windscreen for up to a period of 12 months, and guaranteed at the same time an undiminished water drainage.

BOX CONTAINS: Q² CLEANSE 20ML / Q² REPEL 20ML / 2X APPLICATOR / 4X SUEDE / MANUAL
PRODUCT PURPOSE: GLASS

SELF CLEANING

Q² View repels both water and dirt from the glass surface. In rainy or night conditions, it is an invaluable assistance, as the driver will notice much faster any obstacles or danger while driving.

Q² TIRE

World's first SiO₂-based tire sealant.

Q² Tire is the only SiO₂ - based tyre coating. It guarantees not only durability, but splendid visual effects as well.

AVAILABLE CAPACITIES: 400 ML
PRODUCT PURPOSE: WHEELS

RESTORES RUBBER

Q² Tire not only secures tires, it also improves their looks, making the wall seem enameled, with profoundly vivid colors. The effect even lasts after deterioration of the hydrophobic effect on the tire.

Q² LEATHERSHIELD

Highly advanced ceramic coating for all types of leather upholstery.

Advanced quartz coating specially formulated for automotive leather. Q² LeatherShield is suitable for every type of leather produced to date and does not change the finish of your upholstery. Very easy to apply, only one layer required. Repels dirt and prevents discoloration, protects against liquids and UV-rays.

BOX CONTAINS: Q² LEATHERSHIELD / APPLICATOR / 6 SUEDE CLOTHS

AVAILABLE CAPACITIES: 50 ML / 100 ML

PRODUCT PURPOSE: LEATHER

PROTECTS ANY TYPE OF LEATHER

Q² LeatherShield is an advanced, SiO₂ (silicon dioxide)-based formula, specially developed for automotive leather upholstery. It provides superb protection against dirt, UV rays and the rigors of everyday usage. Q² LeatherShield is amazingly simple to apply, requiring only one layer.

Q² LEATHERCOAT

Easy to use leather sealant.

Q² LeatherCoat is very easy to use it just requires proper cleaning of the leather prior to ensure good bond, then simply apply to a soft microfiber cloth or applicator and wipe over in an even layer. With durability of up to 3 months, this hydrophobic coating provides protection from liquids, sweat, dirt and also 'dye transfer' from jeans and clothing that can discolour and stain leather.

AVAILABLE CAPACITIES: 120 ML / 400 ML

PRODUCT PURPOSE: LEATHER

MATTE FINISH

As most modern interior automotive leather has a factory matt finish, we made sure that Q² LeatherCoat leaves an invisible layer that does not affect the look or feel of the soft leather trim in any way. It simply coats the leather to ensure its good looks remain the same as the day you bought it.

Q² FABRICCOAT

Very hydrophobic and durable fabric protectant.

Gyeon sets new standards in terms of quartz-based coatings. While developing our product range, we have strived to be as innovative as possible. That led us to the first, fully functional textile protectant containing SiO₂.

AVAILABLE CAPACITIES: 120 ML / 400 ML

PRODUCT PURPOSE: FABRICS

SELF-CLEANING

For use on most woven fabrics and textiles, Q² FabricCoat helps keep these surfaces cleaner for longer and also makes them much easier to clean, whether inside or outside your car. This coating is super hydrophobic, 'throwing' water and liquids off fabric and textiles – even for fabric convertible roofs a high pressure rinse once a month can be sufficient to keep the fabric clean and looking great.

Q² ANTIFOG

No more foggy windows!

Foggy windows and windscreens are annoying and can be dangerous. Q² AntiFog quickly and easily solves this problem, making glass completely clear again and providing perfect visibility. Condensation or 'fog' is mainly caused by dampness in the car, or large temperature differences between the inside and the outside; Q² AntiFog solves these issues in one application that will prevent your windows fogging up again for at least 2 months.

BOX CONTAINS: Q² ANTIFOG / 4X SUEDE APPLICATOR / 1X BLOCK APPLICATOR / 1X SUEDE 20X20CM

AVAILABLE CAPACITIES: 120 ML

PRODUCT PURPOSE: GLASS

EFFICIENT

A 120ml bottle of Q² AntiFog will be sufficient to protect all glass surfaces for more than one winter season in several vehicles. One application for 6 large windows should use a maximum of 20ml of product.

Q²M PRODUCT COLLECTION MAINTENANCE

A superb Q²M series of advanced quartz-based products and accessories for maintenance, for both amateurs and detailing professionals.

Q²M CURE

Versatile hydrophobic quartz maintenance spray & sealant.

The primary job of Q²M Cure is maximum prolonging of the base quartz coating's durability, e.g. Q² Prime or Q² Mohs. Through regular maintenance you, may gain an extension of the excellent hydrophobic effect of up to 90% of the durability of the base coating.

AVAILABLE CAPACITIES: 100 ML / 250 ML / 400 ML / 1000 ML

PRODUCT PURPOSE: PAINT / TRIM / WHEELS

EFFECTIVE

Efficiency is the one of the key features of all Gyeon products, and Q²M Cure seems most illustrative of that. One or two sprays should be sufficient to cover an entire panel as big as a door with a protective coating. Low consumption translates into great value for the quality of our quartz-based detailer.

Q²M CURE MATTE

Q²M CureMatte is a unique, silica-based spray sealant designed for matte-finished paints. It's both a stand-alone product, providing durable protection and self-cleaning abilities, as well as a spray detailer for ceramic coatings. It increases the depth and intensity of the color without adding any gloss to the finish.

AVAILABLE CAPACITIES: 100 ML / 400 ML

PRODUCT PURPOSE: PAINT / TRIM / WHEELS

For the first couple of weeks following application, quartz coatings exhibit an insignificant tendency to develop hard water stain deposits. The use of Q²M CureMatte immediately after the application of Q² Matte will help eliminate that risk entirely.

Q²M WETCOAT

Instant hydrophobicity on all surfaces.

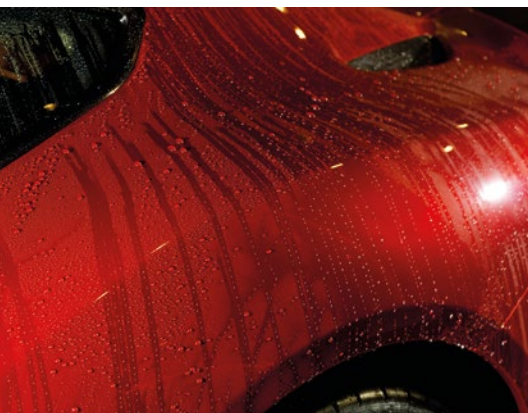

Q²M WetCoat is a instant, brilliantly easy to use hydrophobicity booster. It's a ready to use formula, giving outstanding results in a simple and quick spray on/rinse off process. Despite the ease of use, Q²M WetCoat provides great durability and chemical resistance.

AVAILABLE CAPACITIES: 500 ML / 1000 ML / 4000 ML
PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

POSSIBLE USE ON ALL SURFACES

A major benefit of Q²M WetCoat is its versatile character, allowing usage on almost every exterior surface of your vehicle. It will add great self-cleaning properties to not only the paintwork, but also to plastic or metal trims, rims or windows.

Q²M WETCOAT ESSENCE

The concentrated version of our ultimate and instant hydrophobicity booster.

Q²M WetCoat Essence is the concentrated version of our ultimate and instant hydrophobicity booster. Its formula has been specially designed to secure the best possible hydrophobic effect in just one simple step. No matter whether your car has no coating at all or a quartz coating, which has not been refreshed for a long time – this product will deliver high quality beading in a very short time.

AVAILABLE CAPACITIES: 100 ML / 250 ML
PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

INSTANT HYDROPHOBICITY CONCENTRATED

Q²M WetCoat Essence is the concentrated version of a revolutionary spray sealant that offers instant durable protection – simply spray-on and rinse-off. The real advantage is the strong hydrophobic and self-cleaning effect that is delivered immediately, together with an intense gloss and shine added to all possible exterior surfaces of your car.

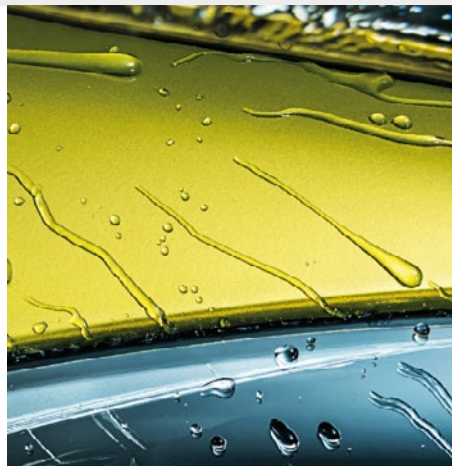

Q²M BATHE+

World's first SiO₂ shampoo
with instant hydrophobicity.

Q²M Bathe+ is the world's first pH neutral shampoo containing SiO₂. Even a quick wash leaves a strong hydrophobic layer, repelling water, dirt and prolonging the need for a next wash. The wash itself is a real joy, while the shampoo is very slick and has a scent characteristic of the whole Gyeon range.

—
AVAILABLE CAPACITIES: 400 ML / 1000 ML

PRODUCT PURPOSE: PAINT / TRIM

EASY TO USE

When it comes to all-in-one products, Q²M Bathe+ can be claimed to be revolutionary! Just a quick wash is enough to obtain a marvelous hydrophobic effect and easy maintenance for the next couple of weeks. It is a phenomenal solution for the wintertime, when washing gets harder and the boost in self-cleaning abilities improves the comfort of vehicle maintenance.

Q²M BATHE

Slick, concentrated and pH-neutral shampoo.

Like other items in our range of products, Q²M Bathe is superbly efficient, for it has a highly concentrated formula. The thick gel is naturally water-soluble, emitting a very pleasant smell, reminiscent of Q²M Cure, as well as producing a long-lasting foam.

PH-NEUTRAL

Q²M Bathe is a quality pH-neutral car wash. It has good cleaning power to dissolve dirt easily, but is gentle and kind enough to not affect coatings or sealants. And because it is pH-neutral, it also ensures that delicate finishes such as nickel / chrome plated or highly polished elements remain pristine.

—
AVAILABLE CAPACITIES: 400 ML / 1000 ML
PRODUCT PURPOSE: PAINT / TRIM

SLICK

90% of paint defects occur as a consequence of improper washing. A two-bucket method, a soft glove or an efficient pressure washer can only partly guarantee success. One of its most crucial constituents remains its slipperiness as a shampoo, which boosts the smooth gliding of the glove over the surface of the paint.

Q²M FOAM

The ultimate pre-wash for coated cars.

Pre-washing, especially on cars where a paint correction has been undertaken, is very important to preserve the best possible visual effect for a longer time. Q²M Foam ensures a highly effective first step in the cleansing process, as it helps to decrease the amount of dirt that needs to be removed during a proper, major wash with a mitt and shampoo.

AVAILABLE CAPACITIES: 1000 ML / 4000 ML
PRODUCT PURPOSE: PAINT / TRIM / WHEELS

THICK AND LONG-LASTING FOAM

A thick foam is one of the major benefits of high quality snow foams. Q²M Foam builds up a very thick and deep foam, sticking to dirty areas of the paint and dissolving dirt and grime. The foam should be washed away by a pressure washer before it starts to dry.

Q²M BUG&GRIME

Strong and effective bug and grime remover.

Q²M Bug&Grime is a strong and very efficient pre-wash product that has been developed specially for the removal of insects, bugs and grime. It dissolves contamination and ensures a safe and scratch-free wash afterwards. It's the first choice product after every summer-evening ride. Q²M Bug&Grime works fast and effective and is wax-safe at the same time.

AVAILABLE CAPACITIES: 400 ML / 1000 ML
PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

STRONG & READY TO USE

Q²M Bug&Grime can be used as a strong and effective pre-spray during the first steps of a thorough wash, leaving it on the surface and rinsing it off. At the same time, it's a fantastic aid during a more intensive cleaning process and will remove old and heavily settled dirt while agitated with a gentle brush.

Q²M IRON

Effective iron filling remover.

Q²M Iron is one of the most efficient, fast-reacting iron removers on the market. This product was specially developed to decontaminate surfaces from harsh ferrous deposits such as brake dust and rail dust easily, making intensive cleansing simple for both enthusiasts' and pro-detailers' alike.

AVAILABLE CAPACITIES: 500 ML / 1000 ML / 4000 ML

PRODUCT PURPOSE: PAINT / TRIM / WHEELS

STRONG COLOR-CHANGING EFFECT

The strong coloring effect of a substance is a very accurate indicator of how much pollution it has accumulated, and of how much work the product has to do. The coloring itself, as is not the case with the products of other manufacturers, which are concentrated solely on this function, in no way translates into the product's performance, though it serves as an illustration to users.

Q²M TAR

Speed up the decontamination process in a safe way.

Unlike most tar removers, Q²M Tar does not affect any exterior surfaces and is bodywork safe. It can be used on paint, glass, plastic trim, both painted and unpainted. As it is pH neutral, it can also be used to remove tar spots from bare polished lips.

AVAILABLE CAPACITIES: 500 ML / 1000 ML / 4000 ML

PRODUCT PURPOSE: PAINT / TRIM / WHEELS

PREVENTS CLAY-MARRING

On soft or medium hard paints, even the use of a mild clay may result in marring. As most contamination can be dissolved by combined usage of Q²M Tar and Q²M Iron, this product is also a great help in the maintenance of cars, which have had paint correction done in the past. It allows you to remove pollution, without leaving blemishes or scratches that otherwise would have to be removed by polishing.

Q²M PREP

Strong, safe and effective pre-coating degreaser.

In contrast to other degreasers available on the market, it not only lifts oily substances and residues of paste or old wax, but is also very capable of solving them, hence their elimination becomes much easier.

AVAILABLE CAPACITIES: 500 ML / 1000 ML / 4000 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

PERFECT SURFACE PREPARATION

Q²M Prep is a necessary supplement for preparing a vehicle for coating application. It allows the elimination of any oily residues, thus creating a smooth, antistatic surface. Q²M Prep has strong cleansing and degreasing properties owing to which the preparation of the vehicle for any detailing activities becomes much easier and more efficient.

Q²M WATERSPOT

Strong and effective waterspot remover.

The biggest advantage of Q²M WaterSpot is its safety on paintwork. Due to inappropriate maintenance, water spots may become an issue on fresh coatings. You can remove the most undesirable defects by using Q²M WaterSpot without the need to polish and, in most cases, re-apply the quartz coat.

AVAILABLE CAPACITIES: 500 ML / 1000 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

EASY & EFFECTIVE

Q²M WaterSpot is very easy to use. Before applying, clean the bodywork with a gentle, pH-neutral HQ shampoo and dry the surface. Then spray directly onto the paint or on a microfiber cloth and wipe the area affected with water spots. If there is strong staining, spray generously directly onto the surface and wipe the surface a few times with an MF. If required – repeat.

Q²M CLAYLUBE

Superb maintenance products for outstanding detailing performance

Q²M ClayLube is totally neutral and developed to work with any type and manufacture of clay bars. It does not affect the clay and remains safe for the most delicate bars. At the same time, it does not cause any staining on the paint. Q²M ClayLube is highly concentrated and might be diluted up to 1:10.

AVAILABLE CAPACITIES: 500 ML

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

Q²M LEATHERCLEANER

Superb maintenance products for outstanding detailing performance

Q²M LeatherCleaner is an efficient and effective pre-coating leather cleaner. Developed along with Gyeon's high-end Q² LeatherShield, it's the ultimate leather preparation product for use before a coating application. It removes dirt, oily residue and even light discoloration. Unlike most leather cleaners, the formula doesn't include any softening or preserving additives, leaving a great surface ready for coating.

AVAILABLE CAPACITIES: 500 ML

PRODUCT PURPOSE: LEATHER

Q²M CLAY

Q²M Clay is a mild clay-bar making it suitable for all paint surfaces. It comes in a handy 100g block that is comfortable to use or even split making it very cost effective. Gyeon recommends using Q²M ClayLube with Q²M Clay to get the best results and allow it to glide over the surface.

GENTLY CLEANS ANY TYPE OF LEATHER

Q²M LeatherCleaner is the ultimate solution for cleaning and preparing leather upholstery for application of a quartz coating. It doesn't contain any softening additives and doesn't leave any residue that could potentially interfere with a quality quartz coating. Q²M LeatherCleaner leaves a fully matte finish and is suitable for all modern types of leather.

Q²M VINYL CLEANER

Natural matte finish with light anti-static properties.

Q²M VinylCleaner is a gentle maintenance product formulated for regular use. It will not discolor or fade any interior trim. Removes dust and light dirt spots in a flash. Does not leave any residue behind, preparing the surface for Q²M Preserve. Q²M VinylCleaner has light anti-static properties, making it a great everyday product for the interior of your car.

—
AVAILABLE CAPACITIES: 500 ML
PRODUCT PURPOSE: TRIM

CLEANS AND PREPARES ALL TYPES OF TRIM

Q²M VinylCleaner is a gentle vinyl cleaner that might be used on all types of trim, including trim protected with quality dressings. It removes dirt and dust leaving a pleasant matt finish and absolutely no residue behind. Q²M VinylCleaner is the perfect solution for everyday use.

Q²M PRESERVE

Superb maintenance products for outstanding detailing performance.

Q²M Preserve is a simple and quick way to restore lightly faded trim parts and preserve all others for a long time. Excellent dirt repellency, anti-static properties and UV protection combined in just one product.

—
AVAILABLE CAPACITIES: 250 ML
PRODUCT PURPOSE: TRIM

PROTECTS AND CONDITIONS ALL TYPES OF TRIM

Matte is the most desired finish for all interior surfaces and Q²M Preserve offers a very neutral, matte, factory-like finish to all interior trim parts. Q²M Preserve creates an invisible layer that does not affect the look or feel of even the softest vinyl trim in any way. It simply coats the trim to ensure its good looks remain the same as the day you bought it.

Q²M GLASS

Superb maintenance products for outstanding detailing performance.

Q²M Glass is the ultimate formula for fast, effortless and effective cleaning of all automotive glass surfaces. Removes oily residue and instantly leaves a smudge free finish. Easy to use and safe for all interior materials like leather, vinyl or alcantara.

—
AVAILABLE CAPACITIES: 500 ML / 1000 ML
PRODUCT PURPOSE: GLASS

SAFE AND EFFECTIVE

Q²M Glass is safe and effective. Removes dirt, oily residue and even light contamination while not affecting previously applied rain repellents. A gentle aroma boosts the superb qualities of the product.

Q²M TOWELWASH

Superb microfiber and wool washing aid.

Our experience and laboratory tests have shown that the best results in cleaning and maintaining microfibers are achieved when a 'pure' cleanser is used. No fabric softeners, no fragrance, no color additives – that is why Q²M TowelWash remains pure.

—
AVAILABLE CAPACITIES: 500 ML

ECO-FRIENDLY

We care about our planet and its future. As microfibers are often washed in the same washing machine as your clothes, we made Q²M TowelWash totally bio-degradable and safe for the environment. Not only are there no fragrance or color additives inside, there are no harmful effects on the ecosystem.

Q²M COMPOUND

A heavy cut compound with very low dust and a great finish.

Q²M Compound is a heavy cutting paste, delivering excellent performance and a high level of scratch removal combined with a very low level of dust and an incomparable finish.

—
AVAILABLE CAPACITIES: 120 ML / 1000 ML
PRODUCT PURPOSE: PAINT / TRIM / WHEELS

CLEANS AND PREPARES ALL TYPES OF TRIM

Q² Primer is a unique formula preparing the paint's surface before coating without the need for any product removal. It will provide incredible gloss and a clear, high quality finish, ready to be coated with any quartz coating.

Q²M POLISH

Q²M Polish is an effective polish, designed to leave a hologram free finish and deep gloss. It also has medium cutting power, proving it to be a great product for one-step refreshment.

—
AVAILABLE CAPACITIES: 120 ML / 1000 ML
PRODUCT PURPOSE: PAINT / TRIM / WHEELS

Q² PRIMER

An ultra-light finish and SiO₂ primer.
Superb pre-coating preparation and glossy finish.

Q² Primer is an ultra-light finish and SiO₂ primer. It provides superb pre-coating surface preparation and an incredibly glossy finish. Its main aim is to perfect the finish on the paints which are hardest to work with, dramatically reducing the risk of scratch marks during the final wipe off before coating. Q² Primer leaves a smooth and slick surface, ready to coat.

ADVICE ON APPLICATION AND PRECAUTIONS

Work with a polishing machine of your choice. Spread at low revs. Work until fully diminished at medium revs. Wipe off with an HQ microfiber cloth. Use a 1:1 dilution of IPA to remove the remaining product and inspect the effect. If needed, re-use.

Q²M PRODUCT COLLECTION ACCESSORIES

Q²M SMOOTHIE

Innovational synthetic fibers for a safe wash.

Its main features – safety, softness and comfort – add extended durability due to the innovative type of fibres. Q²M Smoothie glides over the surface collecting dirt particles in the safest possible way. The washing process feels more “lubricated” and smooth. The mitt is equipped with an ergonomic welt protecting it from slipping or falling. It’s made of genuine Korean material and custom sewn by Gyeon.

AVAILABLE SIZES: 20X30 CM

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

Q²M WOOLIE

Gentle and safe long hair wool mitt.

Q²M Woolie is a rather large, one sided mitt with an ergonomic grip holder on the other side. As it gets quite heavy when wet, the grip holder is a very good feature for safely washing even lower parts of the car without dropping the mitt. The hairs are long, very soft and can absorb really large amounts of dirt without leaving a single mark or scratch on the paintwork. It’s made of genuine Australian wool.

AVAILABLE SIZES: 20X30 CM

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

Q²M MITT

Extremely soft and gentle wool mitt.

Q²M Mitt is a medium size mitt, fitting perfectly into all hard to access curves and parts of the car. It has a separated thumb, making door handles easy to wash without using brushes or smaller mitts. It has a welt on the wrist keeping it on your hand even when completely wet. The hairs are short, remaining at the same time very soft and absorbent.

AVAILABLE SIZES: 20X30 CM

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

Q²M SILKMITT

The perfect solution for drying difficult or low areas on the car.

Gyeon Q²M SilkMitt is the perfect solution for drying those difficult or low areas on the car, and compliments the large Q²M SilkDryer Towel. Containing the same silky-soft but super-tough microfibre material, but in the form of a Mitt with extra absorbent padding inside, the Q²M SilkMitt soaks up large amounts of water.

AVAILABLE SIZES: 20X30 CM

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS

Q²M SOFTDRYER

Q²M WAFFLEDRYER

Q²M SOFTWIPE

Q²M SUEDE

Q²M MICROFIBRES

The safest and most durable edgeless microfibers.

All of our microfibers are developed to suit the products offered. Depending on the surface, Q²M Microfibers are great for applying Q² CanCoat, giving a final wipe down with Q²M Cure or drying your vehicle. All towels provide maximum performance and the highest durability.

PRODUCT PURPOSE: PAINT / GLASS / TRIM / WHEELS / LEATHER / FABRIC

Q²M SILKDRYER

Q²M POLISHWIPE

Q²M BALDWIPE

Q²M DISPENSERBOTTLE

Superb accessories for outstanding detailing performance.

Q²M DispenserBottle is a great aid during polishing, as it's light and comes in a very handy size. Its flexible material allows precise and easy dosage of polishing pastes. Prepared for the Gyeon range, you just need to mark the right field on the bottle so as not to mistake it for a different polish.

AVAILABLE CAPACITIES: 300 ML

Q²M DETAILINGBAG

Superb accessories for outstanding detailing performance.

High quality bags for your personal favourite detailing and maintenance gear. Great quality of Gyeon Q²M DetailingBags and superb materials they are made of protect your Gyeon products even during rapid maneuvers on the road while being stored in the trunk.

AVAILABLE SIZES: 26X21X21 CM / 50X22X30 CM

Q²M WHEELBRUSH

Q²M WheelBrush is an extremely safe, high quality microfiber brush designed to effectively clean your precious rims without affecting their finish. A gentle, yet effective solution both for enthusiasts and professional detailers. Q²M WheelBrush is made of the same quality fabric as our washing mitt, Q²M Smoothie.

Q²M DETAILINGBAG SMALL

The most suitable size for your daily maintenance kit. A basic kit consisting of the most important everyday-use products and some accessories will fit perfectly leaving some space for a spare microfiber or wash mitt. The bag is made of a quality synthetic material, resistant, easy to clean and protecting the products inside well. It's equipped with an optional strap.

Q²M DETAILINGBAG LARGE

The choice for advanced enthusiasts willing to carry safely and in great order a large collection of products and accessories. Multiple, freely arrangeable compartments allow functional product location. Additional pockets and compartments separate various types of accessories and prevent them from moving and damage. The bag is made of a quality synthetic material.

OUR CERTIFIED DETAILER PROGRAM

Gives you an opportunity to work with advanced, professional ceramic coating systems like Q² Mohs+ or Q² DuraBead. Both come with 5 year warranties and this period represents a huge obligation and responsibility with respect to our customers. Therefore, we seek the best and most professional companies in which we can entrust not only a great product, but also the reputation of our company.
